Engineering Journal/Revue de l'Ingénierie
Annual Index/Document de références
Volume 60, 1977

Appropriate roles for biomedical engineering, C.A. Laszlo and J.H. Milsum, No 3 (May/June), pp 9-10.

Artificial islands in the Beaufort Sea, No 3 (July/August), pp 16-17.

Audiometry a valuable tool in testing the middle ear, No 3 (May/June), p 16.

C-CORE—cold ocean research in a suitable setting, H.L. Snyder, No 4 (July/August), pp 13-15.

CCPE: Accreditation board brings uniformity to Canadian engineering programs, No 2 (March/April), p 21.

CSME 1977 Guide: Limits and fits—Basic Shaft System, F. Rimrott and M. Aguayo, No 3 (May/June), pp 38-39.

Canada to participate in first oceanographic satellite experiment, Dr. K.P.B. Thomson, No 5 (September/October), pp 27-28.

Canada's productivity improvement and competitiveness, M.F. Rotmann, No 3 (May/June), p 31.

Canadian Aviation Report, No 5 (September/October), pp 5-17.

Canadian business jet astounds aeronautical world, No 5 (September/October), pp 6-9.

Canadian engineers close the ring, No 1 (January/February), pp 15-19.

Canadian-made instruments used worldwide, No 3 (May/June), p 10.

The case for stainless steel exhaust systems, D.J. Gorman, No 3 (May/June), pp 35-37.

Conservation with CANDU, M.G. Hare and P.A. Ross-Ross, No 1 (January/February), pp 9-13.

Crash locator records flight data up to moment of impact, No 5 (September/October), p 16.

The Dash 7—an aircraft for today's environment, A.F. Toplis, No 5 (September/October), pp 10-14.

Detecting leaks in pipelines and storage tanks, E.O. Butts, No 3 (May/June), pp 45-47.

EIC Sustaining Members/Membres de soutien de l'ICI 1975/1976, No 1 (January/February), pp 25-26.

EIC Sustaining Members/Membres de soutien de l'ICI 1976/1977, No 5 (September/October), pp 18-19.

Engineering and productivity, A.H. Wilson, No 2 (March/April), pp 22-26.

Engineering ethics, I. Reid, No 3 (May/June), pp 18-20.

Engineering in Manitoba, No 2 (March/April), pp 31-35.

Engineering in patient care, M.B. Raber, No 3 (May/June), pp 14-16.

Eoliennes pour les Iles-de-la-Madeleine. R.D. McConnell, J.H. Van Sant, M. Fortin et B. Piché, No 1 (Janvier/Février), pp 20-22.

Flight training in a synthetic environment, D.R. Tait, No 5 (September/October), pp 15-17.

Future developments in CANDU, Dr. J.S. Foster, No 1 (January/February), pp 5-8.

Geography makes aeronautics a 'natural' for Canada, No 5 (September/October), p 5.

Growing pains for Manitoba association, No 2 (March/April), pp 32-33.

Hydro projects provide thrust for Manitoba engineering, No 2 (March/April), p 31.

Ice platforms for offshore drilling, D.M. Masterson, No 4 (July/August), pp 18-19.

An integrated powerhouse for Manitoba's Limestone project, L.A. Bateman and H.R. Hopper, No 5 (September/October), pp 33-36.

Marine engineering—the Canadian challenge, I. Reid, No 4 (July/August), pp 6-11.

H.F. McLean and the Sons of Martha Cairns, No 4 (July/August), pp 29-32.

Medical engineering: an emerging discipline, Dr. J.A. Hopps, No 3 (May/June), pp 4-8.

Medical Engineering Report, No 3 (May/June), pp 4-16.

Medical engineering standards—past, present and future, A.M. Dolan, No 3 (May/June), pp 11-13.

Modelling of the Miramichi estuary, D.H. Willis, No 4 (July/August), pp 20-22.

Nuclear Power in Canada, No 1 (January/February), pp 5-13.

Ocean engineering in a space age, No 4 (July/August), p 9.

Ocean Engineering Report, No 4 (July/August), pp 6-22.

Patient safety integral part of ECG design, No 3 (May/June), p 12.

Ponts sur la route d'accès à la Baie James, G. Dupaul, No 3 (Mai/Juin), pp 26-29.

Railway engineering research—the new-generation trains, J. Hilborn, No 2 (March/April), pp 15-20.

Remote sensing—a burgeoning science, Dr. D.G. Goodenough, No 5 (September/October), pp 23-26.

Research council promotes new technology, No 2 (March/April), pp 34-35.

Submarine transports offshore workers below the surface, No 4 (July/August), p 12.

Ultrasonic echo measures the eye, No 3 (May/June), p 7.

Wanted—Entrepreneurs, R. Grasley, No 1 (January/February), pp 27-29.
